

We have compiled a number of short video clips (link: <https://www.youtube.com/user/AGNeuropsychologie/videos>), mainly for the following modules (the titles of the video clips contain the names of the modules they are meant for):

- 2 and 7 (jumping to conclusions)
- 4 and 6 (theory of mind)
- 5 (memory)

We also offer videos for these modules:

- 3 (changing beliefs)
- 8 (mood and self-esteem)

Note: Youtube clips may be converted to video files, if desired, via [Clip Converter](#). Just start the program, enter the URL of the clip, and download the converted file onto your computer.

Please see the table below for further instructions. Videos are available on slides that carry the following symbol:

Three of the following videos are "homemade" and are best viewed with a free VLC media player. Group members have to detect violations of 10 "unwritten social rules".

Relevant to modules 4 and 6:

-  [MCT - Café \(with overhead transparency\) \(79.3 MiB\)](#)
-  [MCT - Job interview \(with overhead transparency\) \(29.6 MiB\)](#)

Relevant to modules 2 and 7 (Video shot by Sascha Neeße):

-  [MCT - Persecution? \(45.6 MiB\)](#)

Module	Videos - just examples, feel free to play other videos, suggest a role-play or just continue with the conventional exercises.
Attribution (module 1) Jumping to Conclusions (modules 2/7)	No videos Relevant clips from the movies White Noise, Beautiful Mind, 23, PI, Sherlock Holmes can be downloaded here
Changing Beliefs (module 3)	Please note that some videos are not available in all languages. Here , you can access the videos that are essentially language-free. “jumping to conclusions” in an entertainment context. The video Persecution? that we produced is language free. This link contains a video on the confirmation bias (look for the video on flexibility). Videos on jumping to conclusions (see above) may also be relevant here. For another video (awareness test), you can show the group two questions. At the beginning, ask the participants to watch the video and count how many passes the team in white makes. After the video has ended, ask them whether they saw the man in the bear. This video shows how selective our perception is. We have created two videos for this module (no sound, language-free): "Job interview" "Café"
Theory of Mind (modules 4/6)	Participants are asked to identify 10 social norms that have been violated. Clips from the movie The Management may also be relevant, which can be downloaded here .
Memory (module 5)	Videos depicting the false memory effect are available here (clips have "memory" in the title)
Mood and Self-Esteem (module 8 and additional module 1)	For these video clips, English and German instruction on how to present the videos can be downloaded here.
Dealing with Prejudices (Stigma, additional module II)	Videos relevant to mood and self-esteem can be found here . We recommend to show one of the videos from the campaign to end stigma around mental health (initiative by Prince William, the Duke of Cambridge and Prince Harry), website can be found here .

Note: Some of the videos are taken from advertisements. We have no financial or other ties to these enterprises.
